

Aeronautical engineer:

As an international group and leader on its market, ALTEN is involved in major projects in the aeronautical field. ALTEN is a corporation of 26 000 employees around the world, including 88% of engineers. The global turnover for 2016 is 1.54 Billion euros.

ALTEN is a major actor in engineering recruitment in France.

Join the engineers of the Aeronautical Business Unit!

In the frame of our development in Toulouse, ALTEN is hiring:

Aeronautical Engineers to work for our main customer: Airbus Aircraft in Toulouse.

One of our Technical manager directly manages you; your role will be to work on the System Engineering field for Airbus. Our team specifies and develop the systems of the future for Airbus. We are working on several systems such as Flight Management System, Maintenance systems, Cockpit systems... Our teams also work on new methodologies to develop avionics systems; ALTEN is at the cutting edge on MBSE (Model-Based System Engineering) activities.

Your profile:

You are an engineer with a first experience in the Aerospace domain (internship included). You want to work for our customers in Toulouse, the capital city of aerospace activities in Europe.

Moreover, you must be autonomous and rigorous. In addition, you must have a good level in French and English languages (B2 level minimum).

Do not hesitate to send me your resume: vincent.castanet@alten.com with aurelien.moyret2@alten.com in copy.
